

1 List out the question that I couldn't answer during the final eval:

- ACID vs CAP
- static keywords
- sql vs nosql
- What is a thread pool?

2 Review what you've learned

- things I failed during the eval
- rewrite (handwritten) important concepts that I remember from the checklists
  - java collections (list, set , queue, map)
  - jvm internal overview
  - isolation level for transactions
  - WHAT IS A THREAD POOL

3 New things that I have learned

- I start getting basic knowledge about Spring Boot
- Java lambda expression with Functional Interface

4 Plans for tomorrow

- Incorporate today's notes into the general checklist
- Coding problems
- Review two-week session notes again (specifically SQL sections)
